

Arrow Board Sign Blind

The Highway Care **Arrow Board Sign Blind** is manufactured from durable vinyl material and is available in yellow or grey. The blind is suitable for lower boards on light arrow systems or standard P7403 arrow boards where it will cover the sign face.

The blind kit is supplied with mounting brackets. Strengthening will be required from the bracket mounts to the arrow board frame (the nature of this will depend upon the arrow board type / manufacture and will not be supplied in the kit). Guide rods, upper brackets and counterweight are stainless steel and lower brackets are galvanised steel.

The system is operated by a rotary switch, with Up / Down LED indicator lights and takes approximately 20 seconds to deploy.

The kit contains the following:-

- Blind assembly (with integral electric motor)
- Mounting brackets
- Guide cables and brackets
- Cab box assembly
- Rear enclosure
- Cable
- Installation instructions

Double Blind installation on the 'Red Cross Light Arrow' system

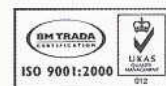

Upper mounting on double blind system showing limit switches and protective cover.
