

Speed Sign Trailer

Speed Sign Trailer

The trailer mounted Speed Sign developed by Highway Care Ltd., offers an easily deployed speed display sign which can be moved to different locations and used to display speeds of oncoming vehicles. The Speed Sign (V1) system offers the facility to display speed only. The (V2) system can also collect traffic speed data whilst displaying speeds, or alternatively collect data only. It can be used to "remind" drivers of their speed when approaching schools, road works, known accident spots and speed restricted areas.

The Speed Sign (V2) system can record speeds without the display being visible, so that realistic "normal driving speeds" will be reflected at specific locations. The speed display unit is mounted on a purpose designed and built galvanised steel trailer complete with battery, spare wheel and matched padlocks, to secure "at risk" fittings. The folding speed roundel frame is spring loaded to allow easy raise and lowering. When in the required position, it and the roundel sign can be locked for security. Roundels up to 600mm can be accommodated. (The display unit can be supplied separately for fixing to a post or other mounting).
