

# BarrierGuard MDS

The **BarrierGuard MDS** system is a further development of the high performance **BarrierGuard 800** steel barrier system which can be used for temporary and permanent installations and is listed in the 'HA Accepted EN1317 Compliant Road Restraint Systems' list. With the addition of a " T " top and anchors at 6 metre intervals along the barrier length, the **BarrierGuard MDS** system provides N2 Containment Level with a Working Width of W2.

The system is available in 12m and 6m long standard lengths (non - standard lengths available to special order). Weight is approximately 135kgms per metre run. Dimensions: Width at Top - 474mm, Width at Base - 540mm, Height - 921mm. Anchor options are available to suit a range of requirements.

Where the barrier is to be used in visually sensitive locations the barrier can be painted and it is also possible to utilise the " T " top to provide support for grow bags or similar, which will allow some decorative planting.
